Budgets track expenses within a Google Cloud project or billing account. You can set alerts to notify billing admins and users, or define spend caps on projects and services when your costs exceed a budget. Your costs are usually recorded within 24 hours. Set your budget with a spend cap to pause services if the caps are exceeded.
Update: Enforced spend caps will now automatically reset at the start of each month, resuming any paused services. You can still manually lift caps at any time.
